**PROTECTING YOUR
VALUABLE ASSETS AND
PHYSICAL SETTINGS**
SUSPICIOUS BEHAVIOUR DETECTION

Giving Shape to Ideas

MORE THAN WHAT MEETS THE EYE: VIDEO ANALYTICS ALLOW FOR INTELLIGENT SAFETY AND SECURITY PROCESSES

Does the issue of protecting confidential documents and sensitive material keep you awake at night? Are you struggling with manual safety and security processes that are causing errors? Are you spending a lot of money on preventing intrusions into restricted areas because of the human labour that is required?

Imagine there was an autonomous solution that guaranteed the greatest safety and security standards in physical settings without the need for any extra personnel – sound good? It is.

When it comes to keeping costs low, automating your safety and security processes is key. Video analytic solutions ensure a high level of safety and security in public and private spaces. Armed with the ability to understand people's behaviour in real time, the surveillance systems analyse unusual events and raise the alarm when necessary.

Konica Minolta's Suspicious Behaviour Detection helps.

SUSPICIOUS BEHAVIOUR DETECTION KEEPS YOUR VALUABLE ASSETS SAFE AT ALL TIMES

Thanks to a combination of state-of-the-art Mobotix smart camera technology and Artificial Intelligence (AI) applications, Suspicious Behaviour Detection is able to recognise suspicious activities and safety risks in real time. It prevents unauthorised access by intelligently analysing and detecting people's movements in physical settings.

Your benefits at a glance

Reduced idle time

Provides 24/7 unattended service

Improved production quality

Minimises human error through automation

Maximum flexibility

Customised and learning algorithms to suit individual needs

Increased transparency

Annotated real-time results and evidence of detected situations

Better production predictability

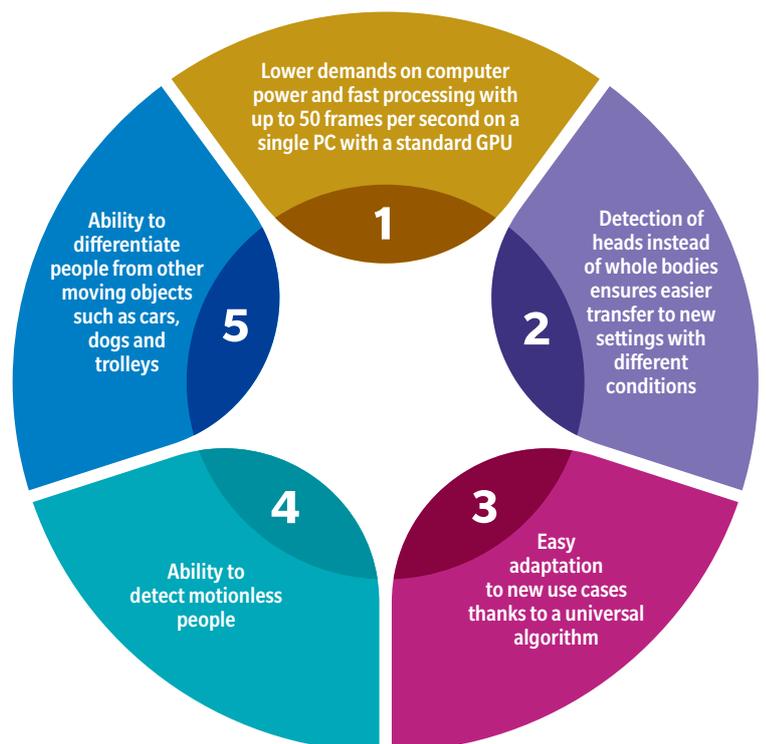

Analytics and statistics on number of detected items and type of defects

Faster reaction times

Frauds are detected in less time

5 REASONS WHY SUSPICIOUS BEHAVIOUR DETECTION IS UNIQUE

KONICA MINOLTA

"We previously have provided this protection with a standard camera system that recorded the image but was unable itself to identify suspicious behaviour and raise an alarm. So the security control relied on the focus and attention of our employees, who, in case of anything suspicious, had to go through hours of recording."

Jindřich Mach

Director of the Internal and Manufacturing Infrastructure Section of CZVV Czech Republic

GLOBAL EXPERTISE ON A LOCAL SCALE

As a global company with a strong local service network in over 150 countries, Konica Minolta is always by your side: listening to your needs, designing solutions around you, installing said solutions in your work environment, and providing you with all kinds of after-sales support.

We combine our long-standing experience in IT services with a strong expertise in R&D to provide new intelligent digital services for your business.
